SUMMARY *Fishing Season* 2018-19

4-15	HARD FABRIC LINE
16-17	PVC LINE
18-29	HYBRID LINE
30-35	DROPSTICH LINE
36-42	ACCESSOIRES
43-47	PLUG N GO

*Freshwater or saltwater?
The pond a bit of a hike from the road?
A quick fishing trip vs. an all day outing?
On the water and concerned about boats?*

Avid fishermen ourselves, we have taken a lot into account when designing our float tubes.

Length	Width	Weight	Max Load
133 cm	103 cm	4.5 kg	136 kg

The "ONE" is an ideal float tube that suits the majority of body types. Lightweight at 4.5kg/8lbs, its "V-shape" is formed by two independent vinyl air chambers arranged within a 600D Cordura shell and inflated via safety valves. The "V-shape" reduces waterline drag and improves maneuverability. Equipped with an inflatable seat, two straps permit anglers to adjust the backrest angle. Separate inflation of seat and air chambers ensure maximum safety. Several D-rings can be used to anchor accessories. Use the two side bags or rear seat space to store small tackle boxes and other gear. Includes a scaled apron in cm.

- Available in camouflage : blue, desert, or white
- Maximum weight capacity :136kg/300lbs

One Devil

Hard Fabric Line

Because float tube fishing above all things should be fun, "ONE DEVIL" is available in black with flame decals and of course all the outstanding design features and capacity as the original "One". An ideal float tube that suits the majority of body types. Due to its "V-shape" water resistance is reduced when moving forward and allows excellent maneuverability. The "V-shape" is formed by two independent air chambers equipped with safety valves. The inflatable seat has two straps to let anglers adjust the backrest angle. Several metal D-rings can be used to anchor accessories. Attached side bags or rear seat space is ideal to store small tackle boxes and other gear. Includes a scaled apron in cm.

- Available in camouflage : Black with flame decals
- Maximum weight capacity : 136kg/300lbs

One Renegade

Renegade Series

Seven Bass Design's the "One RENEGADE" is available in desert camouflage and weighs just 4.5kg/8lbs. This kick boat model is equipped with all the essentials for anglers new to the sport of float tube fishing. Two vinyl air chambers and seat inserts are quick to install. The seat and air chambers are inflated separately to ensure maximum safety. Once inflated, novices to kick boating will be riding high on the water and feeling comfortably secure. Equipment and tackle can be stored in the large attached side bags, the open space behind the seat, or in our unique pocket apron.

- Backpack straps are included for convenient transport when inflated
- Available in camouflage : desert
- Maximum weight capacity :136kg/300lbs.

Bolt

The BOLT is a customizable float tube that was designed to adapt to all your sessions:

Impromptu session : the BOLT is delivered without side bags for traveling light. The unique pocket apron is specifically designed to store small tackle boxes. While a foam seat considerably shortens setup time.

The BOLT apron can accommodate several VØLKIËN Soul tackle boxes (NOT SUPPLIED) for quick sessions. Recommended configurations:

- 2 boxes VØLKIËN Soul VSB-70 and 2 boxes VØLKIËN Soul VSB-60
- 2 boxes VØLKIËN Soul VSB-70 and 2 boxes VØLKIËN Soul VSB-R-085
- 1 box VØLKIËN Soul VSB-80 and 3 boxes VØLKIËN Soul VSB-60
- 1 box VØLKIËN Soul VSB-343 and 1box VØLKIËN Soul VSB-60

Extended sessions : once you have purchased a pair of BOLT side bags, you can prepare them in advance. No need to drag your float tube into your living room to prep for the next day's session. The cargo bags can then be placed anywhere along the Velcro sides. Choose between standard and/or BOLT DELUX cargo bags for larger storage capacity. You can of course mix the two types of side bags according to your needs.

side bags BOLT DELUX

side bags BOLT

Critical to a successful fishing session is the ability to equip your float tube with essential tackle and accessories. Its third season out, the "BOLT" has a unique system of straps, D-rings, and Velcro that quickly redefined an angler's capacity to customize their fishing float tube. Side bags are sold separately so anglers design fits their tackle needs.

The Bolt is for anglers who are considering the "One" but prefer a foam seat and back. Comfortably seated above the water level, the backrest is adjustable via two side straps.

The popular V-shape, decreases waterline drag while kicking and improves float tube maneuverability. The "V" consists of two independant vinyl air chambers equipped with safety valves which are then inflated individually for maximum safety. The entire water contact area is made of Cordura 600D. Our unique zip close pocket apron is a secure shallow pocket designed to hold an assortment of small tackle boxes within immediate reach. Additional storage is located behind the seatback or Flex side bags can be purchased separately.

- Maximum weight capacity : 136kg /250lbs.

special apron with zipped pocket

2 rod holders and security flag holder

The SEVEN BASS "BOLT FLEX" is part of the RENEGADE SERIES. Developed for the North American market, there are several distinctive design features. It has a hydrodynamic V-shape, weighs approximately 11 lbs., and has two color-coded internal air chambers for easy inflation. The underbody is 1000D PVC so the contact area has improved resistance to underwater hazards. The Bolt Flex benefits from the CLIPLINE, a system of nylon webbing and Velcro strips that runs the length of the model to anchor loose gear or CARGO FLEX side bags. There are two backseat rod holders and an open storage behind the back seat, ideal for assorted fishing extras. The apron has a zippered pocket for direct access to small boxes or tackle. Includes backpack straps and foot pump. Maximum weight capacity 136kg / 250lbs.

SB-HFDE-BL

The SEVEN BASS "DEF" V-shaped body is a bit longer than the "One" and "Bolt". Model design feature is defined by a mixed material construction. Minimized structure weight thanks to the upper body 600D Cordura, and improved puncture resistance due to the lower body water contact area made of 1000D PVC. The foam seat is positioned comfortably above the water level. Two adjustable straps modify the inclination of the backrest to adapt to all morphologies. The "V" consist of independent air chambers equipped with safety valves, and inflated individually for maximum safety. Rear seat storage or two generous zippered pockets allow easy storage of your fishing boxes and all the necessary equipment. Several rings allow you to attach various accessories. Includes a graduated stripping apron and backpack straps.

- Available in camouflage : blue, desert, or white.

Advance

Advance Series

Over the past year the option of oars has been of increased interest to anglers. In response to angler demand, Seven Bass Design is happy to introduce our "ADVANCE" option which denotes the addition of oars across a range of said titled models.

The Seven Bass **DEF Advance** is a hard fabric "V" shaped float tube with foam seats. The Advance model denotes removable oars. The design expertise can be found in its complex material composition. The lower body is made of a thick 1000D PVC fabric to better resist puncture from underwater hazards. A lightweight float tube at 5.8kg/13lbs, the upper portion of the outer shell is made of 600D Cordura to minimize net float tube weight. Anglers position the two vinyl air chambers within the shell and inflate via Boston valves. Tackle can be stored behind the seat or in the generous cargo bags affixed on each side. Several rings allow anglers to attach various accessories. Includes a graduated stripping apron and backpack straps. Available in desert camouflage. Maximum weight capacity: 136kg/300lbs

Air

SB-HFAI-B

SB-HFAI-BL

The SEVEN BASS "AIR" seat is inflatable for easier transport and storage. The V-shaped body is closest in structural design to our DEF model with a mixed material construction. Minimized structure weight thanks to the upper body made of 600D Cordura, and improved puncture resistance due to the lower body water contact area made of 1000D PVC. The seat is positioned comfortably above the water level. Two adjustable straps modify the inclination of the backrest to adapt to all morphologies. The "V" consists of independent air chambers equipped with safety valves. Rear seat storage or two generous zippered pockets accommodate fishing boxes and key fishing gear. Several rings allow anglers to attach various accessories. Includes a graduated stripping apron and backpack straps.

- Available in camouflage : blue or white

Special apron with zippered pocket

2 rod holders and security flag holder

The **ELEMENT**'s size and shape is most similar to the SBD and incorporates responsive design features as defined by the North American waterways. This float tube generally fits all body types and is one of the most popular due to increased seat and weight capacity. V-shaped, weighs approximately 15 lbs., and has two color coded internal air chambers for easy inflation. We've incorporated a PVC bottom to minimize risk of puncture from under water hazards. For improved visibility, there is a security flag holder and bright orange accents. An adjustable foam seat positioned above the waterline for greater comfort. The Clipline consists of nylon webbing and Velcro which runs the length of the float tube. It is designed for versatility and to efficiently anchor loose equipment with lanyards and secure cargo side bags. There are two back seat rod holders, and an open storage space behind the seat, ideal for assorted fishing extras (small cooler, pan net, etc.). Our exclusive pocket apron conveniently allows anglers to keep their lures and tackle essentials close at hand. The shallow pocket with double zip closer fits an assortment of small tackle boxes. Cargo bags sold separately.

- Maximum weight capacity : 136kg/300lbs.

SB-HLCO-N

SB-HLCO-B

With the success of the Armada, SBD launched the **COBRA 170** in 2013. A dynamic V-shaped hybrid with all the benefits of the ARMADA plus removable oars. Design details went beyond the integration of oars to include keels to limit the lateral drift and improved navigation. A booster (inflatable removable floor) extended max load from 160 to 180kg. Tackle can be stored in either the removable cargo side bags and in a fitted rear seat splash-proof bag. Backpack straps are included to assist in transport once inflated.

- Available in four colors : red, green, black, or navy
- Weight : 11.0kg / 24lbs.
- Maximum weight capacity : 180kg / 400lbs

TOP

BOTTOM

The TOMAHAWK 160, a middleweight at 12kg/26 lbs., is the first "W" float tube on the market. A unique crossbreed between a fishing pontoon and a "V" float tube. Our distinctive model is engineered to offer optimal glide and comfort. The lightweight oars and rigid keels limit lateral drift and enhances navigation. A wider raised dropstitch seat have anglers sitting high on the water with improved space for bilateral flex casting. Tackle storage can be found in the compact rear seat space or with (2) removable cargo bags.

- Available in 3 colors : navy, army green, black
- Maximum weight capacity : 150kg/330lbs.

Big Boy 180

The new exclusive SEVEN BASS shape of the **LS / HS** cones (low shape / high stability) provides maximum lift, generating maximum stability, surpassing all you can know so far!

The **BIG BOY 180** is the largest model in the SBD line and is ideal for anglers fishing larger predator fish. It has all the benefits of a hybrid: quick setup, ease of maintenance, and highly customizable. Weighing approximately 8kg /18lbs, the V shape chambers provide greater buoyancy and are equipped with summit valves for efficient inflation. This model stands apart thanks to its formidable size and weight capacity of 180kg/ 450lbs. A high positioned dropstitch seat provides greater comfort and support for extended fishing sessions. The backseat storage is proportionally larger than standard models. Equipped with detachable side cargo bags and a lipped apron for tackle essentials. Backpack straps are included to assist in transport once inflated.

- Available in : army green.
- Includes : backpack straps, carry all bag and foot pump.
- Maximum weight capacity : 180kg/ 450lbs.

Expedition Flex

Renegade Series

Register Model

Cargo Flex
side bags can be found on page 37

The SEVEN BASS "EXPEDITION FLEX" is part of the RENEGADE SERIES.

Developed for the North American market, the Expedition is the largest float tube within the SBD line. The Expedition has all the benefits of a hybrid: quick setup, ease of maintenance, and highly customizable. Weighing approximately 8kg /18lbs, the V shape chambers provide greater buoyancy and are equipped with summit valves for efficient inflation. It comes equipped with a trolling motor bracket, so anglers can quickly and efficiently mount a 40lb e-trolling motor. This model stands apart thanks to its formidable size and weight capacity of 180kg/ 450lbs. The Expedition is ideal for anglers on extended fishing session for larger predator fish. The Expedition Flex benefits from the CLIPLINE, a system of nylon webbing and Velcro strips that runs the length of the model to anchor loose gear or up to four CARGO FLEX side bags. A high positioned dropstitch seat provides greater comfort and support for extended fishing sessions. There are two backseat rod holders and the apron has a zippered pocket for direct access to small tackle boxes. The backseat storage is ideal for placing a fishing bakkan for the trolling motor's battery. Backpack straps are included to assist in transport once inflated.

- Available in : army green
- Includes : backpack straps, carry all bag and foot pump
- Cargo bags are sold separately
- Maximum weight capacity 180kg/ 450lbs.

Platform

Register Model

25cm rocker

Platform

An inflatable watercraft, in class all its own, SBD's patented **PLATFORM** is a true crossbreed between a SUP and a hybrid float tube. Ideal for fly or cast line fishing, this sturdy model is approximately 42 lbs. It is engineered using the latest in dropstitch construction. The central platform is ridged when inflated and is supported by two curved side rockers to provide hydrodynamic support. On the hull, two small fins are permanently positioned under the side rockers, while a large removable fin is located at the rear. Oars and cargo side bags are removable to adapt to the fishing session at hand.

Platform's benefits come to life on the water. Anglers now have the choice to cast seated all the while using their fins to guide the craft as with a traditional float tube or cast standing thanks to the rigid central fishing platform. Experience improved movability by simply lifting swim fins from the water and using oars to propel the craft across the water. For longer distances easily secure an e-trolling motor to provided bracket.

After the fishing session, use the dual action pump to deflate the craft. The Platform can then be folded, secured with strap and placed it's carry all bag.

Flatform Flex

 Renegade Series

Register Model

Cargo Flex
side bags can be found on page 37

The **FLATFORM FLEX** builds off of the success of the Flatform. Weighing approximately 42lbs, this float tube unpacks and inflates easily. The significant design difference between the two models is the Clipline. The Clipline system consists of nylon webbing and Velcro which runs the length of the float tube. It is designed for versatility and to efficiently anchor loose equipment with lanyards and secure cargo side bags.

No need for a trailer or roof rack as the Flatform fits in most car trunks when completely deflated. Choose between using fins, oars, or adding a trolling motor. Fish standing upright thanks to the dropstitch platform.

Jungle Operator

Register Model

In 2015, Seven Bass Design launched the **JUNGLE OPERATOR** signaling the next generation of float tube design. Using the latest in performance materials, the Jungle Operator evolved the fishing float tube to a dynamic inflatable fishing vessel that delivers on form and function. The air dropstitch structure creates a ridge platform, so anglers can cast seated or standing.

A formidable float tube weighing 24kg/ 42lbs, the drop stitch material means the structure is ridged while inflated. For enhanced navigation, anglers use fins to navigate slowly or pivot while casting. For greater mobility, anglers lift their feet from the water, rest their fins on the spreader bar and use oars to glide across the water. While for longer sessions or on larger bodies of water a e-trolling motor can be easily mounted. When deflated with the reversible pump the craft can be folded and stored in a carryall that fits in most car trunks.

The PVC structure means that any accessory that can be glued on to an inflatable kayak or SUP can also be glued onto the Jungle Operator.

The Jungle Operator is a portable fishing platform with impressive navigational ability that does not require a trailer or roof rack to transport. Side storage bags are included for essential fishing tackle.

- Available in three colors : green, grey, orange

Platform XL

Register Model

SB-DSFF-XL-V

SB-DSFF-XL-G

Whether fly or cast line fishing, the **PLATFORM XL** is designed to meet the demands of anglers fishing larger open bodies of water such as the Baltic Sea, or anglers fishing remote waters inaccessible to boat and subject to cooler water temperatures. The PLATFORM XL builds off of the unparalleled success of the PLATFORM as a dynamic fishing vessel that delivers on form and function. A cross-breed between a SUP and a hybrid float tube the Platform XL is a portable fishing platform with impressive navigational ability that does not require a trailer or roof rack to transport.

The Platform XL weighs approximately 21kg/46lbs and is engineered using the latest in dropstitch construction. The PVC structure means that any accessory that can be glued on to an inflatable kayak or SUP can also be glued onto the PLATFORM.

For enhanced navigation, anglers use fins to navigate slowly or pivot while casting. For greater mobility, anglers lift their feet from the water, rest their fins on the spreader bar and use oars to glide across the water. While for longer sessions or on larger bodies of water a e-trolling motor can be easily mounted.

Platform XL offers large proportions and a wider central fishing platform, 8ft long and 5.5ft wide. Oars and cargo side bags are removable to adapt to the fishing session at hand.

EFTTEX & ICAST REVIEWS
Every EFTTEX Best New Product award winner

Angling International

Essential reading for buyers in the tackle trade www.angling-international.com

EFTTEX WINNERS

Innovation of the Year CLEE FISHING JUNGLE OPERATOR FLEX

Société Clee: we have so many opportunities in Europe now

The winner of the coveted Innovation of the Year award at EFTTEX believes that the product has opened a Pandora's Box of new opportunities. Société Clee SAS arrived in Amsterdam with the Jungle Operator Flex, a float tube that the company's Sébastien Clee believes has opened the door to all types of fishing. He told Angling International: "The market for these type of products is traditional and old fashioned. They are normally used for fly fishing, but this has created opportunities in other sectors of the sport. "It has been specifically designed to meet anglers' growing desire to fish more remote

waters. Lightweight and easy to transport, it can be navigated by fins, oars or a trolling motor." Clee added that his company's appearance at EFTTEX exceeded all expectations. "Our booth was buzzing all the time and we had visitors from all over Europe, including Russia, Eastern Europe, Scandinavia, Belgium and Germany. "The show really worked for us – and winning the award was the icing on the cake. We are only a small family company so to get this level of recognition was really special. We feel really

Above: all smiles for the Clee team and its innovative float tube.

Jungle Operator Flex

Winner of EFTTEX 2018 INNOVATION OF THE YEAR

Jungle Operator Flex is a product specifically designed to meet today's anglers growing desire to fish remote waters. Building off the success of Jungle Operator, the latest 2018-19 Jungle Operator Flex is a dynamic fishing platform redesigned to incorporate the latest in Plug n' go accessories. Weighing 19.5kg, this inflatable watercraft offers anglers the ability to navigate waters with fins, oars, or with a trolling motor. Inflated, the sturdy central platform supports casting when comfortably seated or standing.

Our exclusive **Flex System** is designed to anchor loose tackle and cargo side bags.

Plug n' Go Ready means convenient universal plugs pre-mounted to efficiently accommodate the latest in must have tech equipment.

It's easily transported. Deflated, folded and stored in a custom carryall bag that fits in most car trunks; eliminates the need for a roof rack or trailer.

Available in orange/black.

BAKKAN Line

SEVEN BASS DESIGN fishing bakkans are water resistant and lightweight for multi-functional appeal. Ideal for storing anything from loose tackle to live bait.

BAKKAN - RH LINE

The HARD **RH** LINE series of Bakkans SEVEN BASS is composed of 2 rigid waterproof bags welded, waterproof splash water and spray. Their zipped lids are perfect for preventing spray and other rain from entering. They each have on each side a molded integrated rod holder, with a locking system of your rod. Both models are equipped with reinforced self-locking carrying handles.

Portes cannes

SB-BKH-40P	Red & White	27l.	40 x 27 x 25cm.

BAKKAN - HARD LINE

The HARD LINE series of SEVEN BASS Bakkans consists of two rigid waterproof bags, medium sizes (22.5 and 27 liters) ideal to store tackle and lure boxes. Zipped lid designed to help keep the content dry. Both models have a handy outside pocket that can receive either a small box or an aerator if you need to turn your bag into temporary livewell. They are also equipped with self-locking reinforced handles and an adjustable shoulder strap.

SB-BKH-40	27l.	40 x 27 x 25cm.

BAKKAN - SOFT LINE

The SOFT LINE series of Bakkans SEVEN BASS is composed of four semi-rigid waterproof bags welded, waterproof splash water and spray. Respectively their capacities are 20, 25, 45 and 85litres. You will find in this range the perfect bakkkan for storing your boxes of lures and accessories. All their lids are zipped. On occasion you can wish to turn them into temporary tanks. The three largest models are equipped with self-locking reinforced carry handles, and the four models have an adjustable shoulder strap. Because of their flexible structure, they are not bulky when flattened for storage and storage.

So you can customize or simply improve your craft, by adding this support which will welcome an electric motor or any other accessory that you will need to fix, clip or tie on a rigid base. Support comes with 4 pads and glue.
ref : **SB-KSMA**

kit de réparation EXTASY LIQUID PVC

new 2019

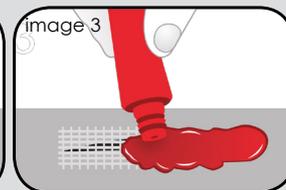

EXTASY LIQUID PVC for the repair of all products made of PVC.

Now you do not need to look for a patch of similar material to glue a boat, float tube, standup paddle or damaged raft. Just put a few drops of EXTASY LIQUID PVC on the perforation or cut. EXTASY LIQUID PVC will follow you everywhere, whether in the mountains, at sea, in the river!

MANUAL:

The surface to be repaired must be dry and clean. EXTASY LIQUID PVC should be used for all punctures of a product, or a cut of 2-3 cm maximum. Just drop one or more drops of EXTASY LIQUID PVC at the location of the puncture or cut (picture 1). For best results, apply an additional coat of EXTASY LIQUID PVC again after a few minutes (picture 2).

If the damage is too great and it is about a cut / notch of more than 2-3 cm, then it is necessary to use a reinforcing frame during the apposition of the first layer. The second layer must be passed within 5-10 minutes (picture 3).

It is obvious that these repairs concerning products whose use is subjected to a vital risk, (boats in PVC, float tube, pontoon, raft, etc.) the degreasing of the surface to be repaired is MANDATORY! Post repair use should not be done before 24 hours. Not suitable for repairing rubber goods!

Rotating seat 360

The all-new SEVEN BASS 360 seat will allow you to attach a turntable to the boat, boat, and even your cooler benches, thus welcoming the seat that rotates 360°.

The 360 is a clever and not definitive solution for more comfort during your sessions on your boats.

Plug&Go - SRS (SIDE RACK SYSTEM)

1 Choose the length you need

You will first have to choose the rail length, depending on your needs and the use you will make of it, to create your Side Rack System (SRS). It comes in 60cm and 1 meter.
 the rails are to be fixed directly on the gunwales of your boats. You will need to get the matching screws and the best suited to your needs, depending on whether you attach to wood, fiber or aluminum. In the vertical position, openings are located on one side of the rail, and to position downwards to evacuate all the water that would otherwise be stagnant.

Réf 60cm : SB-KP202-60
 Réf 100cm : SB-KP202-100

2 Choose the orientation of your use

option VERTICAL

In vertical use, you can easily fix your rail to an inner edge of your boat. You will need to use the VERTICAL rail base. You can position as many VERTICAL bases as you need, and your rail length can accommodate!

Réf : SB-MT420

option HORIZONTAL

In horizontal use, you can fix your rail flat on the top of the gunwale of your boat. You will have to choose between the horizontal bases HIGH or LOW. So you can position as many bases as you need, and that your rail length can accommodate!

3 With all the rest of the PLUG & GO range of accessories, let your dreams run wild and your needs, by attaching cane doors, echo sounder door, camera stand, etc...

In order to benefit from the SRS, but without having a permanent solution, we offer you 2 other temporary options adapting to particular cases

PLUG&GO - complet Kit SRS for bench

The PLUG & GO SRS complete kit for bench allows you to temporarily fix a 30cm mini rail on a boat or inflatable boat bench, thanks to a second plate, thus simply taking the bench in sandwich.
 It comes with 2 LOW horizontal bases that can accommodate the entire PLUG & GO range.
 For bench width 22.5cm max

Réf : SB-BP425

PLUG&GO - complet Kit SRS - SIDE

The complete PLUG & GO SRS - SIDE kit allows to temporarily fix, horizontally or vertically, a 30cm mini rail on a gunwale, a boat bench or anything!
 Thanks to its vice system, it can be fixed on any support less than 6.5cm thick.
 You can then choose to set the bases according to their uses (HORIZONTAL, HIGH or LOW), then to accommodate the entire range PLUG & GO.

Respect Mother Nature

Create in 1995 Societe CLEE, a family company based in Bordeaux, has been revolutionizing the fishing and hunting marketplace across France and the EU for over 20 years. **SEVEN BASS Design**, a Société CLEE brand, is dedicated to developing specialty fishing watercrafts and ancillary fishing accessories. Sebastien Clee has directed product development for the past 12 years. Seven Bass Design is consistently a first movers in innovation, design, and technique developments. Below highlights some of our many first to market product launches

- **2011** : **ARMADA**. SEVEN BASS DESIGN introduces the first tubeless PVC hybrid float tube in Europe
- **2012** : **COBRA**. The first hybrid PVC float tube with oars, for improved mobility, launched in Europe.
- **2014** : **JUNGLE OPERATOR**. SEVEN BASS DESIGN reinvents float tubes as we know them by integrating dropstitch technology. Renegade anglers can now fish seated or standing. As well as use fins, oars, or a trolling motor.
- **2015** : **SKULLWAY**. The first fishing float tube with an incorporated trolling motor mount. Go the distance!
- **2016** : **BOLT**. SEVEN BASS DESIGN introduces the **Flex system** to anchor gear and customize cargo storage. Float tube can now be personalized for the fishing session at hand.
- **2016** : **PLATFORM**. Seven Bass Design registered PLATFORM is introduced.
- **2017** : **série ADVANCE**. SEVEN BASS DESIGN float tube anglers now have the choice of a classic cordura float tube with oars.
- **2017** : **TOMAHAWK**. A cutting edge design to support enhanced multi-angled casting.
- **2018** : **JUNGLE OPERATOR FLEX** Wins Efttex's top award "Innovation of the Year". The ultimate float tube is now plug & go ready.
